

Certificate in relation to air transportation of Mobility Aids with Lithium Batteries by passengers with walking disabilities

We hereby certify that the product

**„Volksrolli by MED TEC“
HMV 18.50.07.0010**

including the **lithium-ion battery** HBS-24X11K30D0235H/TP fulfil the requirements of
IATA chapter 2.3.2.4

and therefore the system may be carried as checked baggage without restriction.

Only the battery has to be removed for transportation (protected from unintentionally switching on, damage and from short circuit by other luggage e.g., by placing the battery in a protective pouch) and **carried** in the **passenger cabin**.

The lithium ion batteries are tested according UN-Manual of Tests and Criteria" Section 38.3.

The rated energy of the batterie is with 284,9 Wh **below** the IATA limit of **300 Wh** for batteries which can be removed by the user.

The pilot in command must be informed about the location of the battery.

We strongly recommend contacting the airline sufficiently in advance to request approval for transport.

This certificate does not apply to damaged or defect batteries.

Due to the frequent amendments of the respective regulations, which partly occur on an annual basis this certificate is valid until **1st March 2026**.

Bocholt, 1st March 2025
Fellerhoff MED TEC GmbH
